What is Low Vision?

Low vision is a visual impairment that cannot be fully corrected with regular eyeglasses, contact lenses, medication or surgery. Despite all conventional treatment, vision remains blurred or distorted, and it interferes with the ability to perform every day activities such as reading, writing, and shopping. Millions of Americans lose some of their vision every year. Irreversible vision loss is most common among people over age 65. Most people should seek out the care of a low vision specialist when their correctable vision reaches 20/70 or greater.

What are the major causes of low vision? Is it part of getting older?

Low vision can result from a variety of diseases, disorders, hereditary factors or injuries that affect the eye. Some of the most common causes of low vision are Age-Related Macular Degeneration, Glaucoma, Diabetic Retinopathy, Optic Atrophy, Retinitis Pigmentosa, Cataracts, and Stroke. Some normal aging in our eyes and vision occurs as we get older; however, these changes usually do not lead to low vision. Your eye care professional can tell the difference between normal changes in the aging eye and those caused by eye diseases.

How do I know if I have low vision?

There are many signs that can signal vision loss. For example, even with your regular eyeglasses, do you have difficulty:

- Recognizing faces of friends and relatives?
- Doing things that require you to see well up close, like reading, cooking, sewing, or fixing things around the house?
- Picking out and matching the color of your clothes?
- Doing things at work or home because lights seem dimmer than they used to?
- Reading street and bus signs or the names of stores?

These examples are just a few early warning signs that may occur. Often, the earlier vision impairment is diagnosed, the better the chance of successful treatment and maintaining remaining vision.

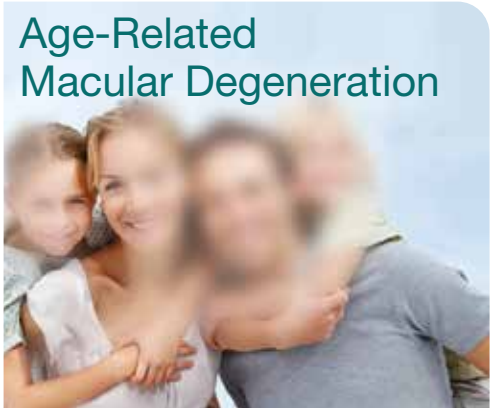
How do I know when to get an eye exam?

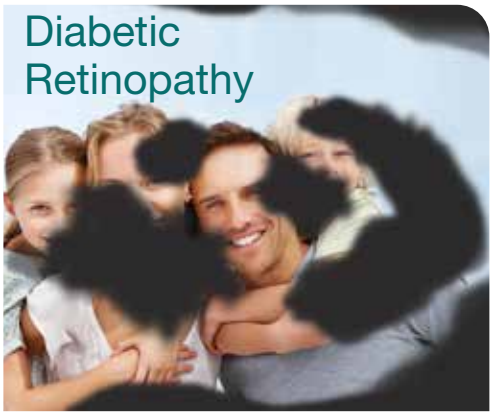
Regular dilated eye exams should be part of your routine health care and special considerations, such as age or family history, may impact the frequency of needed visits. However, if you believe your vision has recently changed, you should see your eye care professional as soon as possible.

Connect with us:

What can I do if I have low vision?

It is important for a person who is having vision difficulties to immediately schedule an appointment with an eye care professional for an eye examination. If a person's vision cannot be treated by conventional methods, they should ask their doctor for more information about vision rehabilitation. It is important to establish good communication with a low vision or product expert and to educate themselves about available services and products.





What Types of Low Vision Aids are Available?

If you are among the growing number of people living with low vision, you may be surprised to find there are many forms of assistive technology and adaptive aids to help with your daily needs. Before buying low vision solutions or consulting with a specialist, think carefully about your goals, your budget and what activity you miss the most living with your vision impairment.

SIMPLE SOLUTIONS EFFECTIVE FOR EVERYDAY LIFE

At Optelec we believe that by offering the right tools, we can help people who are impacted by vision loss perform their daily activities, continue their hobbies, read, write and maintain employment. If you would like to learn more about our wide assortment of products, we encourage you to visit our online store at **www.optelec.com.**

LIGHTING

Lighting plays a significant role in your day to day activities. Whether you need increased lighting for reading, crafts, hobbies, cooking, or paying your bills, our wide range of lighting options allows you to find the lamp that is right for you. Choose from a variety of lighting options in tabletop, floor, portable, or magnifying lamps. (Refer to pages 24-25.)

FILTER LENSES

Designed for indoor and outdoor use, the filter lenses can help improve contrast, reduce glare, and prevent eye strain. Especially recommended for those with cataracts, macular degeneration, diabetic retinopathy, and glaucoma. These fit-over or wrap around filter lenses are a perfect solution for computer work, walking outside on sunny or cloudy days, and enjoying time at the beach or in the snow. (Refer to pages 26-27.)

ELECTRONIC LOW VISION PORTABLE VIDEO MAGNIFIERS (1.5X TO 30X)

Recommended for those with good mobility, a need for high contrast and magnification generally up to 10X. These are offered in different screen sizes with several adjustable magnification ranges for expanded reading functionality. Great for use on the go or to use from room to room. (Refer to pages 17-23.)

ELECTRONIC LOW VISION DESKTOP VIDEO MAGNIFIERS (1X TO 75X)

Recommended for extended reading, writing, viewing photos and hobbies. Beneficial for users who need high adjustable magnification or have limited motor skills. Generally have a table surface on which the intended reading material or object is placed. A camera directly above will project magnified images on a large monitor screen. The desktop video magnifier offers high contrast viewing modes, auto-focus camera, and adjustable brightness so you can read comfortably. Some models also include Speech capability. (Refer to pages 8-16.)

ELECTRONIC SCANNING AND READING

Recommended for individuals who have very little or no remaining vision, or may be experiencing eye fatigue with magnifiers. Converts printed text into speech that is read aloud in natural sounding voices. Available in more than 60 voices and in 30 different languages. (Refer to page 16.)

Optelec's electronic solutions are available through our Authorized Dealer network and by ordering online. Call us at 800-444-4443 to connect with a local representative near you and arrange an in-home or on-site demonstration!

SIMPLE SOLUTIONS EFFECTIVE FOR EVERYDAY LIFE

After being diagnosed with a visual impairment and learning about the different types of low vision aids available, you may begin to feel overwhelmed by the sheer amount of information. To find the best solution for your needs, ask yourself the following questions:

WHAT IS MY EYE CONDITION?

Most commonly diagnosed are: Macular Degeneration, Glaucoma, Cataract, Diabetic Retinopathy, Retinitis Pigmentosa, etc.

WHERE DO I NEED ASSISTANCE?

- One fixed location: either at home, at school or at work
- Multiple locations: at home as well as at school or at work
- On the Go (portable): while traveling, shopping or dining out

FOR WHICH ACTIVITY DO I NEED HELP?

- Spot Viewing: labels, price tags, and menus
- Distance: Looking at school boards and presentations
- Writing: cards, shopping lists, checks
- Reading: letters, books and the newspaper

On the following pages we offer simple and effective product solutions that address each of the demands listed above. If you still feel unsure about what is right for you, simply contact our knowledgeable Customer Care Specialists or one of our local Authorized Optelec Dealers. They can help ensure you find the tools and support that best meet your low vision needs. We offer in-home product demonstrations with no-obligation, hands-on training, as well as workshops, technical support and superior customer service.

ClearView GO

Full-featured desktop video magnifier with a compact design

ClearView GO offers the same reading comfort, ease of use, and functionality as a desktop video magnifier - but in a compact design.

It is the ideal solution for people who need magnification at different locations. With ClearView GO, you can comfortably read text and view objects, at home, office, classroom, or on the go. Its folding design makes it extremely easy to take the ClearView GO with you and store it when you do not need it.

With ClearView GO, you will enjoy a crisp, clear, full HD image on the 15.6” screen. The monitor can be fully adjusted, so you will always have the right reading angle. The ClearView GO has a convenient 3-in-1 rotatable camera that allows you to magnify text and objects up close, in the distance, and even to look at yourself. Simply point the camera to what you want to see and adjust the settings according to your personal preference.

ClearView GO

ClearView GO is the latest addition to the ClearView product line and the first desktop video magnifier by Optelec that is one that folds flat and features a 3-in-1 rotatable camera.

FOLDS EASILY

FEATURES

- Full HD – 1080p with autofocus
- Video magnifier with large 15.6” screen that easily folds away
- Read text and view objects up close, in the distance and view yourself
- Portable – use at different locations: up to 5-hour battery life
- Unique zoom and pan features
- 3 selectable magnification ranges to suit your eye condition
- Read down pages without moving reading material thanks to the moveable camera
- Connect to TV screen for even bigger image with HDMI
- 2-year warranty

Clearview C

The Optelec ClearView C is a modern desktop video magnifier that is designed to improve your reading experience. The unique design provides you with more working space to read, enjoy craftwork, or write with comfort and ease without being restricted in movement.

Thanks to its superior camera, the ClearView C offers sharp magnified images in full color and high contrast. The high-definition models offer a very wide overview which makes reading large documents and magazines a breeze. The optional Speech module allows you to simply sit back and listen to text as it is read aloud. The best part about the ClearView C is that it is truly customizable to your needs.

COMPACT SET-UP

COMFORT SET-UP

Comfortable Reading

The C-shaped design provides you with more working space, so you can read your favorite newspaper and perform hobbies without being restricted. The reading table moves away from your body to offer more freedom of movement which a unique feature among desktop video magnifiers.

Contemporary Design

The ClearView C is designed to increase your reading comfort and to complement the interior of your home. The high-quality materials and sleek design provide a contemporary look that is inviting in any room.

Customizable Set-up

You can customize the ClearView C according to your needs. Switch from basic to advanced functionalities, create more working space, use a larger reading table, and upgrade the ClearView C with several other modules. Anything is possible.

Read & Work More Comfortably!

Ergonomic product design with customizable features helps you to read with ease.

High Contrast • Full Color • Over 60 Voices & 30 Languages • Quality Sound

Traveller HD

Read anywhere! Unlike a desktop magnifier the revolutionary Traveller HD allows you to comfortably read letters, newspapers and other materials at the dining table, in bed, or in your favorite chair.

Reading **without** Limitations

- Lightweight
- Portable
- Battery Operated
- Large Widescreen

The unique Slide & Read mechanism provides you with a more natural reading experience, by simply sliding the screen across a line of text and viewing the content on-screen. It has never been easier to follow the line or sentence, especially for people finding it difficult to keep a steady hand. Sliding back and forth enables you to recognize the shapes of individual words faster. This allows you to see a more complete line of text on the large screen, enabling you to read more fluently.

What's unique about the Traveller HD?

- The Slide and Read enables you to effortlessly navigate from the top to the bottom of the document
- The slides help you to follow a straight line
- Use the zoom wheel to adjust the level of magnification
- Use the reading line to stay straight while navigating horizontally
- The large 13.3" screen makes it easier to recognize the words that are being displayed
- The brightness can be customized from ultra bright to soft and sharp

Traveller HD

Wherever you are, at home, in the office, at school or on holiday, the Traveller HD is your ideal lightweight reading companion.

Superior Image Quality

In high-definition, enjoy stepless and variable zoom, with adjustable magnification starting at 2.4X. The Traveler HD allows you to see the smaller details of photos and text on a bright 13.3” widescreen.

Connect with us:

Read Anywhere, Anytime
No Strings Attached

COMPACT 6 HD

COMPACT 7 HD

COMPACT 10 HD SPEECH

Compact 10 HD

Compact 10 HD is the only reading solution you'll ever need. Featuring an intuitive design and a large 10" customizable touch screen, you'll experience all the benefits of a desktop video magnifier, but in a much smaller, portable package you can use at the store, home, school, office, or while travelling.

The New Standard of Portable Magnification in Tablet Format

- Lightweight
- Portable
- Battery Operated
- High Contrast
- Swing Out Arm
- Distance Viewing

Ready when you need it!

Start reading within seconds of powering on Compact 10 HD. A quick start-up ensures you'll never have to wait to read newspapers, magazines, mail, menus, see photos, prescriptions, price tags and so much more. A unique foldable handle allows you to comfortably read and write using a variety of positions no matter where you are.
A 2-year warranty is included.

Adjustable Handle for Easy Reading

Distance Viewing

Compact 10 HD Speech

Upgrade to the Compact 10 HD Speech and give your tired eyes a rest. A convenient text-to-speech feature allows you to take a snapshot of a document and listen along as the text is read back to you out loud.

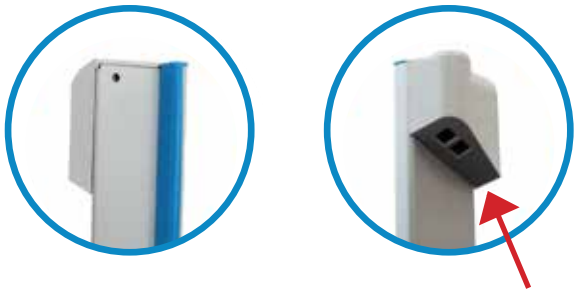
Easy Reading

A generous High Definition 10” screen allows you to fit more text on the screen for a seamless reading experience. With more words on the screen simultaneously, you’ll find that reading becomes easier and more enjoyable, even in high magnification.

Connect with us:

Key Features and Benefits

- View and magnify text, objects and photos
- Portable magnifier in a tablet format
- Quick start-up – ready when you need it
- Customizable, high-contrast touch screen buttons
- Continuous zoom: 0.5X to 22X magnification
- 3 unique multi-purpose cameras – read, write, and view objects at a distance
- Save snapshots
- Rechargeable battery offers up to 8 hours continuous use
- Weight: 2.02 lbs.
- 2-year warranty



Front Side & Back Side Camera

Compact+ HD

The Compact+ HD offers so much more than optical magnifiers. It provides adjustable magnification for all character sizes and document types, so you don't have to have other magnifiers with different magnification strengths. Thanks to the bright widescreen, you can read text, and view images and objects even in sunny conditions.

Text that used to be too small, can now be enlarged in the size that is ideal for you, in the color settings you prefer. Designed to sit in the palm of your hand, you can even take it with you and read anything, anytime and anywhere.

SPECIFICATIONS

- Continuous magnification: 3X to 10X
- Camera with focus distance up to 2"
- 4.3" full color TFT widescreen display
- Adjustable document viewing modes
- 4 high-contrast color combinations
- Integrated LED lighting for even illumination
- Full color for viewing photographs and images
- Retractable handle
- Rechargeable battery
- Battery charging time of 3 hours
- Dimensions: 5.1" x 3.1" x 1.3"
- Weight: 8.9 oz
- Contemporary design
- Takes and stores images
- Ergonomic, foldable hand for easy viewing
- 2-year warranty

Compact 7 HD

The Compact 7 offers a vibrant high-definition screen in a handheld magnifier. With adjustable magnification starting at 2.5X, the Compact 7 HD allows you to see the smallest details of photos or objects on the ergonomically positioned, bright 7” widescreen.

Connect with us:

LIFE KEEPS MOVING AND **SO CAN YOU!**

- Continuous magnification of 2.5X to 30X
- High definition auto-focus camera for superior images
- Carrying case, wrist strap and a microfiber screen cleaning cloth
- 5-hour continuous use rechargeable battery
- Immediate reading with “one-touch” to open and power on
- Save up to 75 captured images
- 7” High Definition full color TFT widescreen display

FEATURES

- Dimensions: 7.5” x 5.1” x 1.1”
- Portable and lightweight at only 1.4 lbs. (22.6 oz.)
- 2-year warranty

Compact 6 HD

The Compact 6 HD is more than just another electronic magnifier. Being only a half inch thin, it is a pocket-sized, 6” touch screen magnifier that you can use at your desk, at a store, at home, at school, or at the office.

DESIGNED TO **MEET YOUR NEEDS**

- View and magnify text, objects and photos
- Small and pocket-sized design
- Easily switch between Easy Mode and Advanced Mode
  - Easy Mode for increased ease-of-use: only use buttons for contrast & magnification
  - Advanced Mode for additional functions: access to menu, clock, and extra options

FEATURES

- Large 6” high brightness touch screen
- Continuous zoom: <0.5 to >21 times magnification
- 2 High definition auto-focus cameras for reading and viewing objects and photographs
- High contrast semi-colors for easier reading (set up to 4 combinations from a possible choice of 16)
- Reversible USB C connector for charging
- Rechargeable battery offering an average of 3 hours continuous use
- 9.5 oz
- 2-year warranty

Compact 6 HD Speech & Accessories

Point the Compact 6 HD Speech to a text, take a snapshot and listen to the text as it is read aloud. The pocket-sized Compact 6 HD Speech captures, recognizes, and reads text to you in over 25 languages.

FEATURES

- Scan and read full page documents
- Integrated speaker for high quality sound
- Charging station for the Compact 6 HD Speech
- Intuitive touch screen buttons, especially designed to use with the Speech Dock
- Foldable design for convenient storage and carrying

OPTIONAL DOCKING STAND

ENJOY **SPEECH ON THE GO**: JUST POINT, CAPTURE & LISTEN

- Point the camera, capture the text, and listen as the text is read aloud
- More words on-screen for maximum overview
- Easy to hold thanks to the ergonomically designed side grips
- 2-year warranty

- Flexible Arm to get the light you need, exactly where you need it
- 5-Level dimming in each color mode
- Wireless remote for control over power, dimming and light modes
- Adjustable clamp base
- 2-year warranty

Sunglasses and Glare Control

The ImproVision PROSHIELD light protection spectacles have been designed to assist people with reduced visual acuity who often also experience lower contrast sensitivity.

Contrast sensitivity is the visual ability to see objects that may not be outlined clearly or that do not stand out from their background. The ability to see a shade of gray ona white background or to see white on a light gray background declines with age. Cataracts, diabetic retinopathy and other conditions can also affect contrast sensitivity.

Special blue blocking or comfort filters provide help in this context and enhance the ability to see in contrast. Blue blocking and comfort filters increase contrast sensitivity.

Return Policy

If for any reason you are not satisfied with your purchase, simply return the product(s) within 30 days of the invoice date. Please follow the below steps for an easy return of your product(s). This information is for returns of Electronic Solutions, Daily Living Aids and Professional Products.

1. Please call 800-444-4443 to be issued a Return Merchandise Authorization (RMA) number prior to returning the product. The RMA number must be clearly marked on the outside of the box.
2. All returns should be insured and proof of delivery obtained from the carrier of your choice such as UPS or FedEx and sent to:

   Optelec, 15301 Springdale Street, Huntington Beach, CA 92649

Returns must be returned pre-paid and we cannot accept C.O.D. deliveries.

- A 15% restocking fee is charged for all non-defective products received after 30 days.
- Non-defective products may not be returned after 60 days.
- Shipping and handling costs are non refundable.
- Optelec is not responsible for loss or damage during shipment.
- Non defective products accepted for return must be in resalable condition, in its original factory packaging with all instructions, manuals, or accessories, received free of personal markings, and packed in a protective outer carton.
- Shortages of products being returned when compared to the customer-packing list shall be the responsibility of the customer.
- Defective products will be replaced or repaired if they are under the manufacturer's warranty.
- In-warranty defective products may be referred and returned directly to the manufacturer.

Please notify Optelec within 14 calendar days of the invoice/packing date of any orders that were shipped incorrectly. All products that are damaged after shipment will be repaired or replaced at the cost to the customer.

Accounts will be credited following the receipt, inspection and approval of returned products. It usually takes 1-2 billing cycles for a credit to appear on your credit card statement for accounts with credit card payments terms.

Optelec selects the optimum carrier for each package. If your package is received damaged, please contact our Customer Care Department immediately upon receipt. We are happy to provide you the information to contact your selected carrier and process your return. In any case, please do NOT discard the packaging. An inspector from the carrier will likely investigate the claim before the return can be made.

For questions please contact our Customer Care Department at **800-444-4443**

* Terms are subject to change without notice
